

How to solve electricity services for remote areas ?

A Made in Europe solution.

The solution skU03 is a professional solution to provide electricity in a clean and practical way. The self-consumption solar kit with battery aims to produce your own electricity during the day, to store the overage produced in order to reuse it at night. All our kits are modular, expandable and provided with assembly guide.

Unique System for Provider

Our solution skU03 is the best system to provide electricity to all customers who don't have services today. It is the perfect system and a lower cost solution for remote areas. In less than 2 years depending on the selling price of electricity, system is paid and population have comfort and services. The provider can expand is network to all communities.
